The Testament of Joma, the oldest and most important text, especially with regard to the illustration of the Book of Joma in this category, is the pseudepigraphy testament of Job, which survived in its oldest version in Greek, in the Slavish translation derived from Greek and, in its last form, of the seaside variants and Arabes. [12] The oldest men's testament of Job is in the decree of the Pope Gelasius, promulgated by 496 DC, in which it is convicted as a passage: Α à € †† [13] Literally belongs to the "Testaments", a body apparel of writings that have been compiled to preserve the teachings and histories of large, usually asbellers, figures whose names they carry. [14] Within this group, working testament is, in its general skin, more related to the testament of the twelve patriarchs, while, as the testament of Moses, it is characterized by a narrow adhesion to the text of the Bible. The Testament of Joma is, therefore, thought of several scholars that are fully based on Greek translation. [10] Before completing this brief research on textual problems, the remaining Greek translation should also be mentioned, since they were taken into account by the church's parents in their comments on the book and therefore could have an influence on iconography. fol.3-job.1.1 / 2 fol.17-job.1.18 / 19 Fol.59 Bottom-ix.8 fol.154v-job.xl.24 Bibliothâ Nationale, Codex gr. 134 Date: 13 (?) - Initiate XIV Séclo. 13. The text of the workbook shows so many extensive and essential differences of the original Hebrew, which is necessary to infer a deliberate modification of the prototype, at least at a certain point, by the Greek translator or by the use of an unknown prototype today. [5] The most impressive peculiarity are the extensive omits observed and commented very early. The development of this dogmatic enmity culminates in the Testament of Joma, where the atrophied dialogue does not preserve nor a trace of the philosophical analysis of the problem provided in the original poem. The main consequences of all these changes are that the point of view is not clearly discerned from their friends and therefore the problem itself is not more highlighted as in the Prototype, and 33 miniatures. 2 And he had seven children and three daughters.
