This document includes a general description of the product and detailed instructions that explain how to install the NX-8V2 plate inside the housing and how to program the control panel. To use this document effectively, you should have the following minimum qualifications: basic knowledge of electrical wiring and low-voltage connections Basic knowledge of control panels. Control Panel Installation Manual NX-8V2 1 Chapter 1 Enter Summary This chapter provides a general view of your NX-8V2 control panel, including Basic Installation and Terminal Connections. Contents Product General Description 2 Product Content 2 Plate Installation 3 Wiring 3 Terminal Descriptions 5 Module List 6 Chapter 1: Notification Codes 2 Installation Manual NX-8V2 Control Panel The Control Panel NX-8V2 is a residential safety and alarm system that offers the following features: Sophisticated software that allows 99 users to interact with up to 48 zones and 8 partitions. Integrated fire modules entry/exit. Fast formats of SIA and Contact ID. Extension of the system with up to 32 modules. Keyboards may include NX-148E-RF keyboards that have built-in wireless receivers. Figure 1: NX-8V2 control panel 91 2 3 4 5 6 7 8 10 11 12 13 14 15 15 18 19 20 21 22 23 24 Unit enclosure LED keypad Product contents The NX-8V2 Control Panel usually comes with: A Metal Closure An LED Keypad For additional hardware, see Table 3 on Page 6. Network Chapter 1: Presentation codes NX-8V2 Control panel Installation manual 3 Installation board Inside the metal enclosure, there are slots for board inserts. This allows the PC table to be positioned vertically (Figure 2 below). When you slide the board between the grooves of the slots, make sure the terminal strip is towards the front opening (go ahead) to allow wire connections. Graph 2: Board Installation The wiring board 1 below lists wire lengths for a keyboard at the end of the wire. By connecting more than one keyboard at the end of the cable, a superior caliber cable is required. Table 1: Maximum Correction of Key Wire Length in Foot Wire gauge for NX-8V2 Wire gauge for NX-320 E 250 24 22 500 20 18 1000 16 16 16 16 16 14 14 2500 14 12 On page 4 is shown the wiring diagram for the NX-8V2. Chapter 1: Presentation codes 4 NX-8V2 Control panel Installation manual Figure 3: NX-8V2 cable diagram Chapter 1: Presentation codes NX-8V2 Control panel Installation manual 5 terminal descriptions Table 2 describes the terminals shown in the wiring diagram. Table 2: Terminals NX-8V2 Terminal Description R1 Not used R Phone R (red wire in the standard RJ-31X cord) T Tip Phone (green clutch in the standard RJ-31X cord) T1 Not used EARTH Land. Connect to a cold water pipe or a 6-10 foot rod. Entrance AC AC. Connect to an approved UL transformer of 16.5 V 40 or 50 VA Class II. BELL+ and BELL- If used as a siren output (by default), the speaker rating is 15 watts to 8 or 16 ohms, or 30/40 watts to 4, 8 or 16 ohms. If the exitIt is selected in location 37, this output is converted to voltage output, 12 VDC, 1 a maximum load. A resistance of 3.3 kohm is required at the bell terminals when a 12 VDC siren is used. If resistance is not used, you can experience tension voltage leakage the siren, which causes these devices to emit a small signal. DATA Connect to the data terminal on keyboards and expanders. The maximum number of devices (more expansive keyboards) is 32. COM Connect to the common terminal on keyboards and expanders. POS Connect to the POS terminal on keyboards and expanders. Individually, this terminal is limited to 1 ampere. Combined, this terminal and AUX PWR+ are limited to 2 amps of total current. SMOKE+ Smoke Detector power 12 VDC, 1.5 amps max (for those jurisdictions that allow use of the priority zone with smoke detectors.) COM Connect the negative cable of powered devices such as motion detectors and smoke detectors. AUX+ Connect the positive cable of all powered devices except smoke detectors and keyboards. Individually, this terminal is limited to 1 ampere. Combined, this terminal and KP POS are limited to 2 amps of total current. ZONE 8 Connect to one side of the loop in Zone 8. Connect the other side to the COM terminal. Open or short causes an alarm. Zone 8 can be used for a two-wire smoke detector using an EOL resistor of 680 W. Common terminal COM (-) for zones 7 and 8. ZONE 7 Connect to one side of the loop in Zone 7. Connect the other side to the COM terminal. Open or short causes an alarm. ZONES 6 to 1 Connect as described for Zones 7 and 8. (Only area 8 can be a two-wire area.) AUX 4 to 1 Connect the negative cable of the low current device (relays or LEDs, etc.). Install 1 kohm resistor in series if connected to a LED. Connect the positive cable of the device to AUX+. The current is limited to 50 mA. Chapter 1: Notification Codes 6 Control Panel NX-8V2 Installation Installation Manual Module List Table 3 below shows some of the modules that are compatible with the NX-8V2 system. Additional information is in customer service Table 3: List of modules Part number Description NX-8V2 Control NX-8V2 only. Control NX-8V2-KIT NX-8V2, LED keyboard NX-108E, transformer 16.5 V 40 VA. Control NX-848-KIT NX-8V2, LED keyboard NX-148, transformer 16.5 V 40 VA. NX-108E NX-108ELED keyboard. NX-116E 16-zone LED keyboard. NX-124E 24-zone LED keyboard. NX-148E LCD keyboard with 48 alphabetical zones. NX-148E-RF 48-zone LCD keyboard with built-in 48-zone wireless receiver. NX-200 zone duplication kit (includes 100 resistors of 3.74k and 100 6.98k). NX-320E Smart power supply and bus extender. NX-408E 8-zone wireless expansion module. NX-416E 16-zone wireless expansion module. NX-448E Wireless expansion module with 48 zones. NX-507E Output module with 7 relays. module.
