Here is how you can mirror to other Android devices: Select "Media Players" application menu From your target Android device you have to use a media player app compatible with RTSP streams. We recommend to use our app Stream Play which is made for such use. Stream Play provides additional and useful features such network discovery (no need to type stream url), stream recording, background stream, bookmarks management, etc... Once you connect with the media player on your target device the stream should start automatically. You can mirror to multiple devices at the same time! Streaming devices, mirroring apps and plug-ins are just some of the most popular software in 2019. More software is being developed because more people are seeing the power of technology and media, not just only for entertainment purposes but also as a way to earn a living. Stuff like live streaming and video blogging are the most popular trends that require such tools as mentioned above. Most especially if you doing a live stream for games.

The need to mirror the mobile game to a wider screen is necessary. Continue reading to discover some of the best screen mirroring apps of 2021. Download ApowerMirror a mirroring app, a screen recorder, and a screen capture tool, that's what ApowerMirror is. It is a multitasking tool that works on all devices platform. That includes Android, iPhone, computers like Windows, Mac, Linux, Chromebooks, and a lot more. The UI looks like an Android emulator on your computer. It is very lightweight and uncomplicated. You can go wired or wireless when connecting. The wireless connection has several ways to connect in any case that the other methods do not work, which is a very rare case. More than that, you can remotely control your phone from your PC using your computer mouse and Keyboard. How cool was that? It conquer the first place on best screen mirroring app in 2022. Download Pros. It can mirror, screen record, screen capture, and annotate. Android, iPhone, iPad, Windows, Mac, Linux are supported. You can remotely control your device on PC. It can be downloaded directly on Smart TVs. Wired/wireless connection Cons. LetsView Free yet full pack. That's how you can best describe LetsView. It is also one of the best screen mirroring apps of 2022. Not all free apps provide this kind of service. Of course, this tool is primarily a mirroring app to any device. Android, iPhone, Windows, Mac, and TVs, name them all, it will work. Similar to ApowerMirror, it also has screen mirroring, screen recording, and annotating features for your satisfaction. As mentioned, these features are usually present on other premium software. Isn't that great? You can now try without worrying about a free trial, subscription, and all. It is all for free. Since it is a free tool, the remote control is not supported. Not to mention, it is also a Miracast ready tool. So you can cast your phone to your TV anytime without restrictions and complicated process. Plus being able to record screen with audio. Download Pros. It is for free. This tool works on all devices platform including TV. Miracast Ready/Wireless connection via QR code scanner, pin, and auto-detection Cons. Wired connection not available. Screen Mirror Accessible anywhere and very simple. Screen mirror defies the norm for providing quality service for a web-based mirroring app. If you guys are familiar with the Chrome browser version of Vysor, it works the same way. In exception of it is not a chrome extension. Vysor is really slow and laggy but Screen Mirror is not. It has a very responsive screen and a simple UI that makes it easy to use. So if you are not up to download any software on your computer, you can try this web-based tool. All you need is a compatible browser and a working internet, then you are good to go. Pros. Free No downloading of software, browser, and the internet is needed. The tool includes a screen capture tool. It has responsive UI Cons. It has lesser features than the other two. It sometimes crashes. LiveScreen Mirroring/Livescreen Mirroring is another screen mirroring app of 2022. Over a Wi-Fi connection you can now share the screen of your phone on your computer using a browser. Chrome, Safari and Firefox. This method is ideal for those who don't like to download app on their computer for safety reasons. You just need to connect using your Internet IP address and feel free to stream videos, music and games easily. However if your mobile device is 5.0 or lower, it will not work. Also it does not support audio transmission to PC. Pros. Android and iOS are supported Cons. No extra features It has a lengthy process when connecting. Google Home The next best screen mirroring app. What's in it for you if the app is Miracast ready? Google home is developed to act as an instrument to cast your phone to TVs. It is Miracast ready, so whatever third-party hardware you might be using, as long as it is a Miracast supported device, it will work. You can browse the internet to check which streaming tool supports this app. Also, this is developed to make your viewing experience satisfactory. However, connecting might be a little lengthy, so make sure to bring Mr. Patience with you. Pros. Versatile Free It works with TV and Android Miracast ready Cons. No added features It cannot work with iPhones. Conclusion Definitely all of the tools mentioned above are the best of the best out of all the screen mirroring apps of 2022. You just need to check whichever tool will suit your needs. Checking for the most reliable and dependable are key when deciding which to use. It is the time of smart devices taking over the old ones. Earlier, we used to sit and watch movies that were being shown on TV. At that time, we didn't have an option to view the movies of our choice. But now, we are completely free to watch anything on TV because of the advent of Smart TVs. A majority of people purchase Smart TVs for the availability of enhanced features. The best thing that people enjoy when it comes to smart TVs is the Screen Mirroring option. Well, the Screen Mirroring option is not only available on Smart TVs, but you can even find it on your PC, laptop, iPad, or any big screen. What is Screen Mirroring? Screen Mirroring is a technique to view all your smartphone's content on any big screen like a tablet, PC, or TV. There is no need to provide complete access to these devices because you only mirror the screen here. Screen Mirroring is not only useful for watching your favorite movies on big screens, but you can even play games, take up video conference calls, coding, and a lot more. Smartphones can perform almost everything these days, but the biggest downside is their small screen. A perfect solution to this problem is screen mirroring. Now, there is no need to set up a projector for viewing anything on a bigger screen. Instead, you can use a screen mirroring or screencasting app to fulfill your purpose. People love to use screen mirroring apps for movie nights and watching the photos in their gallery on a huge screen. Professionals also use these apps to explain office presentations in a better way with the help of a bigger screen. Gaming, watching movies, and every such task feels excellent while viewing them on big screens of TV and PC. So, what are you waiting for? Let's ditch the traditional method of setting up a projector to view anything on big screens and use the screen mirroring technology. Let's explore the options... MirrorTo iMyFone MirrorTo is another worthy screen-sharing app. You can share the screen of your Android phone to your PC with just a few clicks. So, you get a large screen of the computer to control your Android phone seamlessly. Whether you wish to indulge in gaming or get some work done, this is definitely an excellent option. Now, you can enjoy your favorite mobile games onto PC for a wonderful gaming session. For better advantages, you can use a game keyboard in order to control the phone screen. The big screen will take you on a thrill ride of gaming. The high-definition screen will provide you with an amazing visual experience, whether you are playing an adventure game or something filled with action. Other than gaming, there is so much work you can simplify with the help of screen-sharing. You can save the screenshots effortlessly to the clipboard between your PC and mobile phone. Now, you can watch your favorite movie or TV show with your entire family on a big screen rather than watching it alone on such a small screen. You can even enhance the level of communication through WhatsApp, SMS, or other social media platforms by handling it with your PC. The clipboard makes it easy to share content from your phone to your computer. You could directly save the recorded videos of screen mirroring on your PC. With the help of this app, you can directly transfer the recorded screenshots and videos without any need for a USB cable. ScreenMo FonePaw ScreenMo is not only useful for screen mirroring, but you can also wirelessly record your screen. You can mirror multiple devices at the same time to your computer or TV. There is no need to jailbreak your iPhone and iPad for using this tool. Through screen mirroring, you will be able to wirelessly connect your iPad/iPhone to Mac and Windows PC. The screen will be displayed in 1080p resolution on PC and TV. Whether you wish to use screen mirroring for office presentations or movie nights, you can do it all with this tool. There won't be any issues of lagging when you mirror the screen to your PC. The best thing here is that you can even record everything that is being mirrored on your PC with the help of ScreenMo. There are no chances of quality loss as everything would be visible in HD quality. So, you can now enjoy your movie nights, gaming sessions, educational videos, and office presentations on big screens with utmost comfort. It is pretty easy to use the tool. Castto For perfect and uninterrupted screen mirroring from your Android to your TV, you can rely on Castto. It is pretty simple to use this app because we can say that the app functions itself. You only need to start the app and connect your TV with it. The app will handle everything else. Whenever there are new updates of the app available, you can enjoy them for free. The app is compatible with all the Android versions above 4.0. Now, you can enjoy your movie nights on big screens with a single click of your smartphone. You can even have uninterrupted gaming sessions on big screens to raise the level of thrill and entertainment. Reflector 4 You would have never felt screen mirroring and recording to be so easy if you have never tried Reflector 4 screen mirroring and streaming software. There is no need to set up any hardware or wires because everything here is wireless. All you need to do is download and install the Reflector software on your Windows, Mac, or Android devices. Later on, you can easily mirror and stream from devices like iPad, iPhone, Android phones, Mac, Windows, and Chromebook. Reflector combines the power of all the media streaming receivers such as Chromecast, Mira Cast, and Apple TV to become a one-stop solution for screen mirroring and streaming. The developers have rigorously tested the core technology used by the software to provide a high-performing and reliable screen mirroring experience. You can also create an ultimate experience of content sharing by connecting multiple devices simultaneously. You can also record the entire screen mirrored sessions for creating tutorials and presentations along with the audio. Screen Mirroring If you are looking for something easy and simple, you should look at the Screen Mirroring - TV Cast app on your iOS devices. You can enjoy high-quality screen mirroring from your iPhone or iPad to your TV. This application turns out to be a pretty useful one for serving different purposes. You can easily create presentations for your business meetings on a big screen with this app. You can cast photos and videos for memories and even have a movie night with this app. Whichever app you can use on your iPhone or iPad, you can cast the screen over here to enjoy your favorite movie from different platforms such as Dailymotion, Netflix, Vimeo, YouTube, and many more. The only downside here is that you cannot enjoy mirroring your games because this app still has a 5-6 seconds delay. So, if you are a fan of gaming, you won't find this app to be a good one for you. Other than that, the app is pretty simple and worthy to use. Smart Things Samsung Smart Things is much more than just screen mirroring. As the name suggests, you get to control all the smart things in your house at your fingertips. Every device and appliance at your home that has been registered on the server can be controlled with the help of this app. You can capture some of the best memories and instantly cast them on your TV screens with the screen mirroring function. Whether it is a small photo or a video, you don't have to miss out on family memories anymore. Smart Things connect everything for making your life simpler and entertaining. You can create a brilliant environment by using this app. There are endless possibilities of using Smart Things. For instance, you can track your steps with the help of the Samsung Galaxy Watch, open your door with your phone, cast workout videos from your phone to your TV, and even set up room temperature while you are outside to return to a cool atmosphere in the house. Everyday errands would be taken care of through scheduled instructions so that you can enjoy quality time with your family. With automation, everything comes to your fingertips, and you will only think of it as imagination. So, what are you waiting for? Start creating a complete smart ecosystem with the help of Samsung Smart Things. ApowerMirror ApowerMirror is a high-quality screen mirroring and streaming app that makes use of mainstream mirroring technology. You can mirror their Android and iOS devices to PC through Wi-Fi or USB, and you can even cast the screen to TV without any lag issues. So, you receive an ultimate screen mirroring experience with the option to share your audio too.

ApowerMirror allows you to mirror 4 devices at the same time to your PC. Here, you can use your mouse to move elements on the screen and keyboard for typing. Now, there is no need to install emulators for playing mobile games on PC because you can screen mirror and play efficiently on your PC. With the help of pre-set virtual keys and options for customization, it won't take more than a minute for you to adapt to it. You can use this app for all the purposes like presentations, home entertainment, gaming sessions, live streaming, intelligent education, and much more. The cross-platform feature of this app makes it stand out in the market. No matter what device you are using, you can screen mirror it on your PC or TV with ease. Final Words The first thing that you should focus on while looking for a screen mirroring app is that the app has to be user-friendly and pretty easy to connect. With the right screen mirroring app, you can easily enjoy everything on big screens. The above list will help you to find the right one for your device. Next, read about VPN that works for TV.
