There are three possible outcomes when solving systems of equations. Let's investigate

Graphing Linear Equations Guided Notes A linear equation is an equation that forms a line when it is graphed Standard Form of a Linear Equation is Ax + By - C. In This Form, A, B and <u>C</u> are integers and <u>x</u> and <u>y</u> are <u>variables</u>. A and 8 can also <u>not</u> bolh be zero. 5x - xy = 9 y=6-5x (sector the later on has lost variables, we care y + 5x = 6 - 5x + 5x write it is standard form so it is not a level 5x + y = 6 Linear Equation X (now we can see that A = 5, 8 = 1 & C = 5) Linear Equation 🗸 Is this a linear equation? x=y-9 YES -4x - 8 = yYES 10y2 - 12 = 24 NO 12x = 7y - 10y YES x-y=12 YES

New Magruder's American Government Interactive keeps your class up to date with our rapid changing times. STEM Summer Reading Camp Savvas Virtual STEM Fair for Grades 3-8 A summer adventure of reading and doing science! June-September 2022 Purchase resources for learning at home. Fresh Ideas for Teaching offers helpful tips, lesson freebies, and more from teachers, authors, and other educators just like you. We aim to not only inspire you, but also to keep you informed on new products and tools that will prove useful in your classroom and beyond. Savvas Fresh Ideas for Teaching Blog Loading... you, it was instrumental in getting me thru college algebra, very helpful. Will re-up if any other course might be needed in the future. Ellie Smith - July 2022My College Algebra course went well thanks to your program. The most helpful elements to me were the multiple videos of explanations that started off extremely basic and built up difficulty. I do not learn very well when I get blasted in the face with information then an overly difficult problem. Also the practice tests helped with learning and then performing which helped me retain the lesson. Tylor Qualls - May 2022I passed my college algebra course. Using this website was a lot easier than reading the textbook. And very interactive. Every lesson started with several very short video instructions, followed by practice questions and then test questions. Step-by-step.Ali Al-Hariri - April 2022Your lessons were super helpful, nailed an A. I ended up only being able to take an 8 week College Algebra course online and it was mostly watching videos from an online book with lessons that were at times confusing and subpar. Your lessons were always well explained and made sense. Colleges should literally pay your site to be the course. Once again many thanks. Your site has got me past entrance exams and Algebra. Also my son does your lessons and finds them so easy to follow and understand, so it is great for all ages and experience. Derek Albright - February 2022I used the program to prepare for a College Algebra class after being out of school for a long time. I highly recommend it for anyone. It's a great program. Jamia Hensley - January 2022Yes! I just finished College Algebra! I couldn't have done it, much less make an A without you guys! Thank you! Goldie Headrick - December 2021This College Algebra course helped me greatly. I appreciate the time put into this site and all the help given to me for such a low price. Thanks again for all the help. Much love. Brandi Maddrey - October 2021Thank you so much. The college algebra was a great refresher for myself (I am an adult learner/returning to college to finish my degree after many years away from any schooling). Thank you for breaking concepts down into understandable terms, and using memorable techniques to put it down on pencil and paper. I earned an A in my class (College Algebra), and it is a vast improvement in my understanding of math (I was not too great with math in general in elementary and high school). Thank you for giving me a boost in "mathematical confidence"! Thank you so much! Victor Guanzon - June 2021 Extremely helpful to someone taking college algebra 30 years after graduating from high school. Thank You! Chandra Vaughan - May 2021 found the College Algebra course to be EXTREMELY helpful. I thought every concept was explained in a way that was easy for me to understand. I am currently enrolled in a College Algebra course at a university after spending over 15 years out of school. I tried to take the same course in spring of 2019 and was completely lost because I didn't remember any of the fundamental concepts. I feel like the course on your website has adequately prepared me for this semester and I expect to have success. Thank you for providing these resources for students such as myself. There's no way that I could feel as confident going into this semester without having gone through the training that you provided. Thank you for all that you and your team does. I wish you all the best. John-David Butler - August 2020Very helpful. The College Algebra program met my needs. I will definitely consider coming back to it in the future; will suggest this program to my friends. Joseph Breeden - July 2020This College Algebra program was very helpful! I never understood math until I completed this course. Thank you!!!!Katelyn Howington - June 2020It was very helpful for College Algebra and if I take another math class, I will be signing up again!! Thank you for a great resource. Charlotte Schrock - April 2020I loved having the lecture and practice problems, with the options to see either only the answer or step by step instructions. I liked the multiple choice. Overall, I really liked your College Algebra program and wish that I had known of it earlier. Michelle Theriot - October 2019I found the entire College Algebra course helpful. I have gone back to finish my bachelor degree at the age of 35. I did great in Algebra and Trig in high school but that was so long ago. I was not able to pass the first exam of my College Algebra and Trig in high school but that was so long ago. I was not able to pass the first exam of my College Algebra and Trig in high school but that was so long ago. I was not able to pass the first exam of my College Algebra and Trig in high school but that was so long ago. I was not able to pass the first exam of my College Algebra and Trig in high school but that was so long ago. I was not able to pass the first exam of my College Algebra and Trig in high school but that was so long ago. I think I would be scheduled to take my final this coming weekend without your lessons. You made it very simple to grasp the concepts! Thank you for the help!Paige Miller - April 2019I have recommended it to family members with children who are struggling with Math in both middle and high school. I was very impressed with the website in its current format. Most helpful elements: thorough and consistent instructional videos, methodical and systematic approach to everything from basic factoring to logarithms and functions, and ability to see the work for the problems presented. There are so many more but these were the most helpful. Thanks again!Keith Mcghee - January 2019 Your course does not have a lesson on the topic you entered. Try entering a different keyword, or select the button below. I have a lesson on the topic you entered. Birth - 2 Math examination, and am awaiting those scores. The MathHelp.com course I feel prepared me for both examinations. Thank you! As for elements of the course that were helpful were that the videos for each lesson were broken down into different steps, rather than one long video for each lesson. Having different sections made it easier to start and stop as I needed and skip when necessary. Having lessons within a unit be separated was a great layout. I also thought the side bar with links to the earlier videos were helpful to remind yourself of some other concept. It was helpful that there were both practice questions. I have recommended this website to my friends who also need to take the Math CST exams! I am a 50+ who decided to go back to school late in life. I need to take College Algebra to obtain my degree. To avoid prerequisite math classes, I needed to pass their placement test. It has been a "a few years" since I took a math classe. I needed to study and searched for online courses. I came across many sites, but Mathhelp.com had the best setup, so I signed up. The course are put together in an easy-to-follow manner and provide everything you will need to know. I went through the entire course are put together in an easy-to-follow manner and provide everything you will need to know. I went through the entire course are put together in an easy-to-follow manner and provide everything you will need to know. video, followed by practice, followed by the questions were so easy to follow. It is all on one page. There is no navigating back and forth. If you get one wrong, you are given a step-by-step explanation on how to get the correct answer. The reinforcement of each concept is helpful. The videos really make it so easy to learn. The three instructors are great and teach each subject clearly and in a detailed manner. Whether your child is struggling in elementary school, or you are a college student who needs. I aced my placement test. I now feel fully prepared for the College Algebra class I'm taking next semester. I highly recommend this course. My College Algebra course went well thanks to your program. The most helpful elements to me were the multiple videos of explanations that started off extremely basic and built up difficulty. I do not learn very well when I get blasted in the face with information then an overly difficult problem. Also the practice tests helped with learning and then performing which helped me retain the lesson. My last PERT test went amazing, I scored 124 after many attempts before using your program. The most helpful elements of your course where the diagnostic tests and the video reviews. In school I had big problems with math and always considered myself like a liberal arts person. But with this course I prepared for the Accuplacer to be able to take classes I need in college without mandatory remedial classes and I even fell in love with math. And now I understand it very well, thanks to you, and I find it charming to solve different type of equations. Even though English is not my first language I was able to understand everything. So after preparation from scratch I passed this test very easily to the level I needed. So thank you, guys! You've made a great product! have to say how much I enjoyed your TX PACT class. It was a great reminder of things I haven't done in years. Your explanations were so simply put and easy to understand. I felt confident while taking my test, and actually enjoyed studying for it. My FTCE Math test went great and I passed. Your program was exceptional. I loved all facets of it. I like the fact that if you knew one component you could take an exit ticket and move on to the next section. The videos were awesome too. I used the website to prepare myself for my math placement test to get to college and I got in!!It was all very helpful to me and is the reason I was able to pass the NES Elementary Math test!It was all a great refresher! The higher level math (above basic addition and subtraction) was super helpful to referred a colleague to your site who needs to pass the test too! I found the algebra sections to be the most helpful. I passed my MEGA middle school math test, thanks to your site for just 2 months and passed with flying colors! The first time, but I used your site for just 2 months and passed with flying colors! The first time time I took the PERT I got a 103, and the bare minimum requirement was 114. The second round I used MathHelp to study, and scored 130 out of 150! The instruction videos, and practice tests helped me a lot. Everything about MathHelp is absolutely wonderful!As a math-phobe, I needed as much help on the FTCE math test as could get. A teacher at my school suggested your program. I loved your back-to-basics approach to help someone like me, a 58-year-old who never liked or could do math. I found your instructions and lots of practice questions over and over again to get the steps correct. I always especially had trouble with measurements and geometry, and I think your program helped ease my anxiety and confront those questions head on. It also helped me get straight in my head the positives/negatives and when they apply in addition, multiplication, etc., as well as how to take a word problem and make it into a solvable algebra equation. It was an extremely helpful program for me. Keep up the great work! That course was the absolute reason in my success of the TSIA2 test. I did pass it and can take College level algebra instead of developmental math. Specifically speaking, the quadratic equations, functions/graphing, linear equations in two variables and expressions, equations and formulas really helped. So I'd most definitely give that course a lot of credit to helping me pass. Myron Johnson (MJ's Liquid Gold)I was more than satisfied with the math help program. I only got 2 questions incorrect on the math portion of the TABE test. I don't remember having any issues going through the lessons, and always felt more than ready moving to the practice portion, then the test portion of each lesson. Each video was at a very easy pace to follow it was clear and to the point. I loved having the practice portion and always felt there was enough to practice on to really nail it down. For me my main issue in school was when the teacher would ask "ok does everyone understand it? Ok awesome moving on now" I was always not ready to move on because there was never enough repetition for me to really truly understand the material I was working on. There was material that I struggled with really bad in high school that I immediately was able to grasp during your lessons. If I ever encounter a period in my life and schooling again where I need help on math I will surely come back to math help. Beyond the teachings; the UI of the website and how smoothly everything worked was definitely a surprise for me. Thank you for the help.I hadn't practiced math in 7 years, but going through the course helped me place high on my Accuplacer QAS test! I'll be attending University this fall and couldn't have done it without MathHelp.comwent from a scoring a 12 to a 68 on the ALEKS test placing me in Pre Calculus at my college. The course was very effective. The reviews at the end of each subject were greatThe lessons helped me tremendously on my math placement test. I'm attending the lessons I placed out of the intermediate classes I didn't want to take, and into calculus. Taking this course has saved me around \$2,000 in classes, and my graduation date was moved up. I'd say it was a great investment!Very smooth remedial lessons and it helped refresh my memory on things I had forgotten about. Overall it was very worth it and I'm ready to take my math placement test this coming month. Your lessons were phenomenal, and I would be remiss if I didn't give proper feedback. Let me just start by saying I have been my favorite subject, but as I'm getting closer to completing my degree, I could no longer avoid it. I knew that there was a possibility that I would have to take additional courses before I was permitted to take the courses I need for my degree, and that would have pushed my graduation time back, depending on how I performed in those classes, first. With that being said, I found the Mathhelp site, saw that there were great reviews, and decided to give it a try. Going through the lessons, some concepts that I didn't understand in high school, somehow made plenty of sense this time around. I found that your teaching style. You explained things in a "relaxed and casual" way, which made the lessons seem more personable and one on one. The other 2 instructors were great too. I had a high hope that these lessons, by some miracle, could possibly help me to test out of any prerequisite classes I would need. Although ALEKS gives you 3 attempts to take the test, I didn't want to have to retake it if I didn't have to. Anyway, I finally took the plunge (ALEKS Assessment attempt #1) and tested out of the prerequisite courses!!!!!!!! I'm not exaggerating when I tell you I was close to crying took my ASVAB and scored a 91, I have never been so confident with my math knowledge in my life, mind you the first time I took the test I scored a whopping 15. I took the test I scored a whopping 15. I took the test I scored a whopping 15. I took the test I scored a whopping 15. I took the test I scored a whopping 15. I took the test I scored a whopping 15. I took the test I scored a whopping 15. I took the test I scored a whopping 15. I took the test I scored a whopping 15. I took the test I scored a whopping 15. I took the test while taking the tests at the end of every question I could see how the math was supposed to look if I got it wrong. It was really helpful for me to go back through that math that I blocked out in high school. My daughter used Mathhelp.com to prepare for the Accuplacer math placement test at her university. The school required a score of 279 on the Quantitative Reasoning test to move on to the AAF test. Then she studied on your site and got a 299 on the QR and a 292 on the AAF test. Then she studied on your site and got a 299 on the AAF test. The method that worked best for my daughter was to take the practice quiz for each section and then read explanations or watch videos of the problems she missed. That way she wasn't spending time watching videos on topics she already knew/remembered well. I then had her take the full practice tests once she had gone through all of the videos she needed to. Sometimes she didn't even need to know, but the videos -- your explanations of answers were sufficient in most cases to tell her what she needed a bit more explanation/step-by-step instruction. Up until this year, she has always done well in math, but a crummy teacher combined with covid virtual school made this year a very tough year for her, and she has lost a lot of confidence as a result. I hope that seeing how well she can be successful again in this college calculus course. Overall, I was very impressed with how well your website prepared her for the tests as evidenced by her scores. I will also use your site as she prepares to take the PSAT next year. I first want to thank you for the MathHelp lessons. They are well done, in a logical order, and I appreciate that there are practice problems in addition to quizzes and tests -- all with the work written out and explained so I could figure out where and why I went wrong in a problem -- and affirm what I did right. It was the best review of math concepts I found while looking for assistance to prep for the ALEKS math placement test at the local community college in which I enrolled. I am 25 years out of grad school (in a social science field), and as I am jumping back into school to pursue nursing -- a heavier math and science field -- I needed to review the concepts that I was able to test out of a few decades ago. I also liked that I could watch the video at double time speed if it was something I just wanted to quickly review :) The examples with word/story problems also helped immensely! I was faced with a couple of them when I took the ALEKS test, and since I had practiced them (their format), they came a lot easier to me. And finally, the fact that there are links to related topics within each lesson made a difference. I checked out a few of the links to related lessons along the way just to make sure I was understanding things as fully as I felt I was, and those lessons reinforced what I knew and gave me confidence to progress to the next section. As for ALEKS, I scored more than what I needed to place into the math class required to complete my prerequisite for the nursing program. I would highly recommend MathHelp! The ASVAB test went well and I scored right into the job I wanted. Thank you for lessons. Mathhelp.com has been a huge help.This program was so helpful. I haven't taken a math course in 20 years and needed to refresh before taking the Accuplacer and going back to school. The test went great, I got a 292/300. It was so great to have access to mathhelp to refresh my long dormant math skills I found the lessons clear and easy to understand. I loved the feature of being able to skip lessons I already knew. The little diagnostic quizzes were great to let me know which lessons I needed to take and which I could skip. Thank you for your work, I found the website to be such a helpful tool! I would recommend to anyone!My CASA test was a breeze, thanks to the practice from the MathHelp course. I believe the most helpful sections of the course for me were the explanations for the more involved word problems. I also needed refreshing for graphing inequalities and volume equations. I benefitted most from the clear explanations and thorough solutions presented in the course. video length is spot on and the five question limit for each test is enough to challenge, but not intimidating or discouraging. Thanks for your great test prep. The ALEKS lessons were indeed very helpful. Your explanations were clear and well laid-out. I've been away from math for nearly 30 years now, and I frankly struggled back then when I was learning. Today, I scored an 84 on my ALEKS placement test, which qualifies me for honors math placement within my school. I'd say you guys are doing something right! If I were highlighting a part that weakness into a strength. Simply brilliant.My test went amazingly! I felt very prepared in taking the ALEKS placement test. I liked the practice problems and tests and I felt I had a good understanding of the concepts presented to me. The course helped me SO much!! I went from not knowing ANYTHING to making a perfect score on my GACE math program admission test! I literally felt doomed before I took this course. I think each of the teachers did a great job breaking everything down and simplifying it. I honestly don't see how it could be any better. I really feel like I FINALLY understanding any of it. Thanks so much for creating this for creating this course. course and helping me get one step closer to fulfilling my teaching dreams! I absolutely loved my experience with MathHelp. I am going back to school to get my Masters in Architecture and haven't taken a math class in 20 years, so I needed to bone up for my Structural class. I appreciated the cumulative curriculum and the online guizzes/ tests with immediate feedback showing work when I got a problem wrong. Also, the ability to download the test scores printout / excel is key. Thanks again for a great service! I took my PERT test this afternoon and got a 139! Was able to skip a bunch of pre req classes, so thank you. :) I hadn't taken a math class since high school 7 years ago so the review definitely helped. The videos were very easy to follow and the practice questions and mini reviews at the end of each section helped a lot. If I ever need more help I'll definitely be using Math Help again! I'd like you to know that I absolutely love the Intermediate Algebra course. I'm 36 years old and have always struggled with math, barely graduating high school because of it and so I began with your program for the PERT test, which allowed me to get a high enough score to pass taking a remedial course. Continuing with the Intermediate Algebra program during the semester is absolutely the reason why I was able to sustain a B grade, and I actually have my final this afternoon and I am confident I will do well.I think the reason that your program works so well is because you keep it short and to the point. All the steps are shown, you don't use a bunch of extra words and jargon, and you keep the problems simple so the student gets a chance to perfect those before going on to more difficult ones within their actual class assignments. There were several places where the things you taught weren't explained in class notes by my school that made a world of difference (such as clearing the radical in the denominator, or using a factor tree to factor rather just trying to guess multiples). It also helped that your course guide exactly followed the flow of the class going from chapter to the class coursework. It was an easy lateral movement. My not getting an A in the class is simply because I make silly mistakes like forgetting signs or the simplest math errors, but I feel confident in the course and that's simply 100% from your program. Thank you for all the help your program. T concepts. Most of the practice tests I took were very spot on. I would say you guys covered most of the basics someone needs to know! They do a scaled score from 20-80 on the test and a 41 is passing. I actually got a 70 on the math content for the GRE exam. The last time I studied math was over 7 years ago, so my math skills were almost non-existent until I found MathHelp.com. The course for the GRE was incredible - it covered all the material for the exam. The instructors are experts and very skilled at teaching the math concepts in a very clear and detailed yet broken down manner. I also like the practice questions which prepare you for the test of each lesson. The bonus material added to some lessons is also extremely valuable especially for the nature of the GRE. Thank you for the creators of the website and the instructors' hard work in delivering this top notch content. I give this course a 5/5 rating. I passed my tests! I was using this service to refresh my math skills and it worked. I appreciate the service! You all do a great job. As an adult, I realize that we don't always maintain knowledge if we don't use it. Your format reintroduced me to proper methods, gave me time to practice, and then tested me. It was worth every penny for the positive learning experience. I am not one to leave a review for Mathhelp.com so other people can know how good this website is! I was skeptical at first having to pay for a PERT study course but I am so glad I did. I hadn' done any math since high school which was 7 years ago for me and I didn't remember anything at all. But I followed this course for 2 weeks and in that time I learned more than I had at years of school. I scored a perfect 150 on my PERT and because of it I got to take the Accuplacer and scored well on that too which placed me in Pre Calc and Trig! It saved me from taking over a year worth of lower level maths and thousands of dollars. For \$50 it was definitely worth it and I would recommend it to anyone who needs to take any math placement test or just wants a refresher in math. I only wish all my math courses used mathhelp.com it is by far much superior to Pearsons mymathlab which pails in comparison. The structure of this course was by far the most efficient way I have ever been taught math. I just want to say thank you!My ALEKS test went really well! After not using math in over 7 years after using the MathHelp lessons I placed into calc which was a higher course then I needed! I genuinely loved the program and the structure of it. The videos are short and to the point and the practice problems allow for you to mess up before you take the test. Thank you for creating this site and offering at an affordable rate! I was able to score an 81 on my ALEKS test which was far more than satisfactory for the placement I needed. I really enjoyed the clear explanations in the videos! All of the presenters did such an amazing job of clearly explaining the material, and the fact that you could speed the videos up and still really understand what they were saying was a game changer. All in all I was very pleased with the quality of the site, it reminded me of the way my favorite math teacher in high school taught. Such an amazing resource!My ALEKS test went really well, much better than I needed to place into a class in fact. I thought the teaching was excellent at mathhelp.com. There was just enough information provided to answer the questions without any extra fluff. If I need additional help I'll look to enroll in another mathhelp course to boost my chances of successI'm a 40 year old going back to college at Penn State online to finish my business degree. I have not taken a math class in 20 years and when I found out that I had to take the Aleks test, I researched tutorials online. Out of the many tutorials that I sampled before I purchased, mathhelp.com was the best at providing short lessons that were to the point. I finally understand Algebra because of these lessons. I took the Aleks test this week and scored high enough to place me into Algebra II, my only other math class will be Calculus. That was my goal and I accomplished it. I do plan on using mathhelp.com again when I start Algebra II, my only other math class will be Calculus. Because of this tutorial, I am no longer terrified of math!Mathhelp.com was extremely helpful. I increased my math placement test score by 135 points by using the website. I am now ready to take college algebra. The teachings are a good pace and the most helpful thing are the links to previous lessons that remind you of building blocks you need for the current lesson. Also, the option to have the audio of a problem on the practice problems is extremely helpful. This program was very helpful and beneficial. I ended up passing the TSI. I think the biggest help was the "work" part of the problems and tests where I could see where I went wrong. Thank you.I graduated high school in 2004. When I took the PERT "practice tests" I was shocked to see how far my math skills had slipped through the years so I needed a refresher. The course I took a 10/10 and my advice to anyone preparing to take the PERT Math portion would be to not waste their money on any other study guides. This course was perfect and taught more in depth concepts than what I saw on the test. I was prepared to the point that the test itself wasn't difficult at all. The program was immensely helpful! I passed the General Curriculum Math MTEL 03 on the first try, which from what I understand almost never happens Thank you to you and your team for the awesome support and structured format to reacquainting me with mathematical concepts that had been long forgotten. It's never been easy for me to recall formulas during high-pressure testing situations but you presented the material in a way that took it to its most essential parts and gave examples that made sense. Particularly, I found the video-based lessons and the multiple examples of each to be most helpful. I also enjoyed the instantaneous results from the lessons and quizzes to test my knowledge along the way. Thank you so much!My daughter really liked using mathhelp.com! She needed it for some refresher learning in preparation for her Accuplacer college placement test. Imagine her surprise when she scored so much higher on her math than she thought she was going to! Thank you for your helpful product!Wanted to say thanks so much for putting together the Mathhelp curriculum for people like me. Without all the content I would not have been successful on the TSI placement test. The most helpful was definitely the factoring, exponent rules and fractions involving radicals since you see a lot of that on the test. Overall it was very easy to learn and follow and built my confidence up and helped me be successful. I scored a 350 out of a possible 390 according to my advisor and now I'm in my second week of college algebra on a summer mini semester! Thanks to all of you and keep up the good work. I made a suggestion to my school that they should recommend your site to people like me as a prep for the placement test. My TSI went well and I passed all portions of the test. I found every section of your course extremely helpful. I appreciate all the help your lessons provided and couldn't have asked to find a better TSI study guide. Thanks again. The 6th grade course went well. It was really helpful for my daughter to practice. The best part is that you have categorized the course according to STAAR requirements. It is really easy to pick one area and focus on it. The material is at students' level which they can easily understand. Highly recommend this website and would join again for STAAR tests next time. The Accuplacer went well! The instruction videos were very helpful since I haven't done most of this since high school. The practice and the tests were helpful too. Overall, really great! As a 27 year-old returning back to finish my degree, it has been quite a while since I've been in a math course. After taking my ALEKS exam and only scoring a 54, I was extremely disappointed. I quickly signed up for your ALEKS prep, I scored a 74, and I was able to test into the advanced math class my new degree requires. The entire course was exceptional, and I am very grateful for the thorough education. The placement test went well and I ended up doing really well on my math placement test because of it! I think what helped me most were the videos and the careful explanations. Even if it was something I already knew it served as a helpful reminder. I'm very grateful! I don't usually write reviews, but I am so grateful for this product. Because of MathHelp, my NES Middle Grades test went great!!! I got 60 points more than the minimum passing score and I felt prepared for the test for sure. So many official e the problems looked like they were straight from MathHelp, and I was broadly practiced for all parts of the test. This is a resource I have already recommended and will continue to recommend to others in my grad school program for teaching. MathHelp is an affordable, self-paced, and relevant curriculum when practicing for the NES- I couldn't be happier with the money I spent. I have been out of high school for 30+ years and am going to take a few college courses. I took a practice Accuplacer test and realized that I did not remember hardly any of my high school math so I took the Accuplacer College Level Math prep course. I placed past College Algebra and into Trig with the help of the course. I had a good score on my math placement test. It allowed me to skip the first course and I could have skipped the second if we did not have to forcefully take it. The part that served me the most was polynomial factorization. Besides, the teachers are super clear and the exercises very useful. 100% recommended. I would give this site more than five stars if I could. I used this to prepare for the MTLE NES Math test, and I passed. Thank you!! The PRAXIS Algebra 1 test went very well! I received a passing score of 154, which was 13 points higher than when I took it previously. The lessons that were most beneficial to me were the problems focusing on deciphering word problems, imaginary numbers, and functions. These were the areas I had struggled with previously. I absolutely LOVED how the lessons built off one another and worked together as a whole. Also, thank you for providing links to previous lessons in order to build further background knowledge. I have recommended your program to many fellow teachers. Thank you!Extremely helpful. I haven't studied math in like 5 years but I enrolled in the TSI test and I absolutely killed the TSI math test. The lessons are concise, straight to the point and covers every aspectI passed my FTCE exams! Really excited over here. Your lessons were explained well with your pauses after explaining important elements of a problem. I also liked your extension questions after a lesson. All of the general knowledge and elementary education content was extremely helpful as they generated new questions each time you took them. This was useful for me so I could drill myself until I understood it. Thanks to the teachers on the site! The ASVAB test ended up going better than I expected. I have been out of high school for 11 years and I was studying to retake the test and improve my scores. The website helped out tremendously! Being able to select the course I want to focus on and have it all laid out was very helpful As well as the videos breaking down how to solve the problems before starting the practice. For me, the way everything is broken down and set up was great. If I could rate this program higher than 5, I'd give it a thousand stars!!!!! Thank you, MathHelp! The CBEST went very well and I passed the Math section with a score higher than I expected and on the first try (and math is my worst subject by far)! I was very happy with the MathHelp test prep course and found it to be the most helpful online exam prep I shopped around for. The most helpful part was that the course started with the rounding and place values. Mrs. Peterson is also extremely good at explaining and making the lessons interesting so I could stay focused. Thank you again. The site is very user friendly and it was nice being able to test my knowledge to see if I could skip any lessons. I enjoyed the Accuplacer QAS class very much. All the teachers were really clear. I used a lot of equations and solving for x and multiplication and division of fractions. In general all the material was fine. And i did great on my placement test. good work and I will most definitely use Mathhelp services in the future and recommend them to others! I can't describe how amazing this website is! Best explanations in the whole web! Definitely recommend this to everyone. If it weren't for this, I would've never passed the hardest math test of my entire life. The NCDAP went great! I graduated high school in 2007 and since then had taken no math courses. I was nervous about doing poorly on the placement test and having to pay additional money for remedial math courses. I tested some of the video tutorials and was pleased to see that all the topics from the test were covered by your website. I placed out of all developmental math, so I did not need to take the TEAS test. The most helpful elements were the simplicity and clarity of the explanations. In the past, I've had math teachers skip over some of the "simpler" steps in a problem which they considered more obvious. But your website made sure with each problem to explain all the steps thoroughly. I appreciated this aspect. Another part of your course I found helpful was that it focused on teaching one thing at a time. For my purposes, I can't see how the course could be improved It did exactly what I needed it to do.Your lectures were very thorough and easy to follow. There was so much good material and practice for the ALEKS. If I ever need to again I'll be using math help for a review to test out of a class! I'll for sure let people know it's worth it to use Mathhelp. I took and passed the math TSI exam on my first attempt. I am a 35 year old that hasn't used formulas, geometry, algebra or any other advanced math since high school. The TSI prep that y'all offered was better than any YouTube or practice test I had tried. I think you guys have got the best tool on the market. I used it as an all-around refresher and was able to have the confidence I needed to excel with the test The way it was broken up into lessons, videos, practice and quizzes gives the student the ability to pick and choose exactly what they need help with. I actually placed out of a couple math courses and saved myself 3 free credits! Honestly everything in your math placement test course was very helpful and there's nothing in my opinion that needs improvement. Thanks.My ALEKS test went well and I got into the math class I wanted to. I liked the videos that you can watch to help with the math problem so that I understood it! I personally loved everything about MathHelp. The MathHelp site was a tremendous help to me! I found this site after failing the 1-6 NYSTCE math exam the first time I took it. I have been out of college for 20 years and needed a major refresher course on math before attempting it again. I passed both the Birth-2nd math test as well as the 1-6 math test as the 1-6 m the three elements of video instruction, practice questions and test questions. Thank you! I just received my Accuplacer test scores and I placed 3 classes higher than what I needed to have. All of it was extremely helpful for the AccuPlacer and I really don't see how you can improve on the product considering how straight forward and to the point everything is. The only thing to consider is that the study material gives the basics of what you will see on the actual exam. You will be required to use your own logic, analysis and critical thinking to set up and understand when to use each formula or operation. The CBEST test went well, as I received a scaled score of 66. Element wise, the videos of what you were SUPER helpful. They were clear and to the point, and their short length made it very digestible. The practice questions were also awesome in that they had additional videos breaking them down if I was confused. The ALEKS test went very well for my son, in large part due to your course. So much of the course was clearer than the actual teaching in school. The Course Prep was real fine and it helped me ace the placement test, I got a 35/36. If it wouldn't have been able to review the concepts as efficiently and accurately. I, therefore, want to thank you!! I passed my NES test. This program was user friendly and a great resource Most helpful were the linear equations, systems of linear equations, factorization, percents and geometry. I thought they were excellent. I would recommend your program to anyone taking the NES test. It took the GRE for the second time yesterday and my math score improved. I loved the short videos and then the practice questions directly after And then the section tests. It was all suuruper helpful! got the highest score in my testing group by using this ACCUPLACER resource. I haven't done most of this math in almost a decade, but I was able to relearn everything, practice, and test on it. I was extremely impressed with the effectiveness of this course.TSI Gods! I am old or lets just say older. I haven't had to do a math exam in 22 years. I decided to enroll in college to improve my computer skills. The school counselor recommended I take a basic math class because the TSI would be too difficult for me. I decided to prove everyone wrong and look for help. I enrolled in MathHelp and it literally started me with 1+1. Well not literally but almost. By the time I made it to the end I felt like a math wiz! Everything made sense. I walked in to the TSI and took the most easiest math. I absolutely recommend this site. Of course, I only can talk from the TSI area. Good Luck! Frustrated with your College Algebra

class? Take our course instead. Each lesson in our College Algebra course offers the complete classroom experience, featuring concise instruction, guided practice, and interactive testing. Why waste time commuting to a classroom packed with students and taught by someone you can barely understand? Everything you need is right here in our standalone College Algebra course. After taking our course, simply retake your math placement exam and place out of College Algebra. Alternatively, learn the concepts at home, then go to class when you have a test. However you use our College Algebra course, it's the smart way to conquer remedial math.
