In addition to this attraction, is there anything else attractive about Pokemon Let's Go Mobile? Let's see! Introduce about Pokemon Let's Go Mobile Let's experience what you have never seen in the Pokemon games! Pokemon Let's Go Mobile and the heat like the Sahara Since the release of the first unofficial trailer versions, it has caused a wave of intense public opinion with a lot of information from leakers and fans. It was partly because the visuals shown in those trailers were so impressive. The sharp, beautiful Mewtwo looks like he stepped out of the picture and swung his Shadow Ball into the air. The turtle hero Blastoise is equipped with a huge cannon on his back to shoot like a god, and there are many fierce action scenes that you have never seen before in any other Pokemon series. One of the factors that brought Pokemon Let's Go Mobile to the top is the epic and transcendent Pokemon team mentioned above. They are no longer the beautiful and gentle Pokemon in the legends of Pokemon Trainers but have made a real makeover. They are now smart, sharp, self-controlled, and much fiercer. Now, if you sit down and continue talking about its beauty, you cannot list out all the advantages of this Pokemon Let's Go Mobile mobile game. Although it is the mobile version, no one can say that this is a compact, easy-to-play game. It retains the classic story of the existence of Pokemon in strange sacred lands, the never-ending adventures of talented young Pokemon trainers, and the destruction of the fierce Rocket team. But Pokemon Let's Go Mobile will lead you astray in its world. The number of Pokemon species in this game is up to hundreds. Although this number seems to be quite modest compared to some Pokemon games in the past, it makes so many differences in quality. Each species is unique with its own story, its own compelling personality, which is raised a few steps above what you have ever known. Gameplay When embarking on adventures in this game, you will find yourself not passive at all. You are completely active in the process of capturing Pokemon, just by launching the correct Pokeball at the Pokemon you want to collect on the team. And for the one you don't want to catch, just casually run across it as you are now not forced to talk to it like in other versions. However, the classic plot progression still retains quite a lot. You will still feel excited when meeting old familiar things, and happy to know some small different details in each small thing. The control operation is also very flexible, both showing the tactics and showing the player's level when they must continuously bring their Pokemon team to a higher level. The Pokemon matches themselves are also more jubilant because there are many outstanding variations such as Mega Pokémon. The levels in each Pokemon species are more extended, so the battles are sometimes a bit stressful, no longer simple like before. In addition, the mechanism of leveling up and receiving many rare rewards in Pokemon Let's Go Mobile is quite unique. You will have a lot of situations to train your Pokemon to become stronger, have more fighting opportunities, and face familiar dark forces. Then every time you level up or encounter old story situations, the excitement increases by one point, as if the adventure journey with Pokemon stretches endlessly. Amazing graphics and sound The scenery, the space around are truly rich natural worlds. Many details, color arrays, layers of scenes arranged above and below did create a beautiful and attractive 3D space. I have not mentioned the massive multi-angle architecture in the later scenes. There will be times when you look at your phone screen and do not believe that this is a mobile game. What's even crazier is that no scene is the same. They are rich, from uphill to the sea, forest, and you can hardly find a similarity between the contexts. They are the real world. The sound remains the same, but adds a lot of attractive sound effects, especially in the high-level Pokemon battles. You will feel that this version is a passionate bottle of wine that has taken many years to be made by the developer. It is great both in terms of shape, progression, and small and big changes in gameplay. Download Pokemon Let's Go Mobile APK for Android Pokemon Let's Go Mobile is not only a mobile version of Pokemon but also contains many new and attractive things in gameplay with great graphics and sound. Pokemon lovers must try it.
