Old-School Instagram Filters

The original film and vintage camera formulas for your favorite Instagram filters.

 <p>Polaroid Land Camera The Polaroid Land Camera comes in a variety of models, all of which produce instant, self-developing images straight from the camera.</p>	+	 <p>Impossible Project PZ 70 The Impossible Project's Color Shade PZ 70 film produces instant photos, usually with cooler, washed-out, bluish tones.</p>	=	 <p>Walden Filter</p>
 <p>Lomo LC-A The Lomo LC-A is a 35mm camera that gives you radiantly colored, contrasty and vignettted images.</p>	+	 <p>Velvia 50, Cross-Processed Velvia 50 film provides warm, saturated tones when processed normally. When cross-processed, the colors shift to aqua and greens.</p>	=	 <p>X-Pro II Filter</p>
 <p>Holga The Holga is famous for its dreamy, lo-fi aesthetic—expect a combination of blur, vignetting, and light leaks (lots of light and color in your photo).</p>	+	 <p>Ektachrome, Cross-Processed Ektachrome is generally a balanced, neutral film. When cross-processed, the colors don't shift much, but photos become longer and more saturated (particularly the yellows and aqua).</p>	=	 <p>Lomo-Fi Filter</p>
 <p>Polaroid Land Camera The Polaroid Land Camera comes in a variety of models, all of which produce instant, self-developing images straight from the camera.</p>	+	 <p>Polaroid 600 Polaroid 600 film is a self-developing color film that is often true-to-color, though color shades may vary depending on conditions.</p>	=	 <p>Brannan Filter</p>
 <p>Polaroid Land Camera The Polaroid Land Camera comes in a variety of models, all of which produce instant, self-developing images straight from the camera.</p>	+	 <p>Impossible Project PZ 680 The Impossible Project's Color Shade PZ 680 film produces instant photos, usually with warmer, orange or yellowish tones.</p>	=	 <p>Hefe Filter</p>
 <p>Polaroid SX-70 The Polaroid SX-70 is a folding high-end Polaroid camera produced from 1972-1980, making it a collectors item among instant film fanatics.</p>	+	 <p>Polaroid 600, Expired Polaroid 600 film is a self-developing color film that, when used past its expiration date, can produce images with a faded color cast ranging from orange to yellow to beige.</p>	=	 <p>Earlybird Filter</p>
 <p>Holgaroid Holgaroid is a Polaroid film attachment for back of your Holga, allowing you to create custom Polaroid prints with a Holga aesthetic.</p>	+	 <p>Polaroid 80 Chocolate This is a sepi-like self-developing film that can be used in all cams that use 80 series film. Photos produced will contain purple/brownish tones.</p>	=	 <p>Sutro Filter</p>
 <p>Diana+ Originally a 1960's cult legend, Dianas come equipped with plastic lenses for soft, dreamy photos, and fringe bodies perfect for creating light leaks.</p>	+	 <p>Velvia 100F, Cross-Processed Velvia 100 provides the same colors as Velvia 50 when process normally. When cross-processed, surprise — the colors shift the opposite direction, resulting in warm, red photos.</p>	=	 <p>Poprocket</p>
 <p>Yashica Mat 124 The Yashica Mat Twin Lens Reflex (TLR) is a vintage collector's camera that produces astoundingly sharp portraits without breaking the bank.</p>	+	 <p>Velvia RVP100 Velvia RVP100 film, when processed normally, produces photos with a slight reddish, magenta, pink or purple tint.</p>	=	 <p>Nashville Filter</p>
 <p>Holga The Holga is famous for its dreamy, lo-fi aesthetic—expect a combination of blur, vignetting, and light leaks (lots of light and color in your photo).</p>	+	 <p>Ilford XP2 Ilford XP2 film is a chromogenic, color-forming film — one on which the final image is made of colored dye, with occasional blue-ish undertones.</p>	=	 <p>Gotham Filter</p>

* There are lots of other factors that will affect your results, from the age of the film, to exposure of the shot, to the chemicals your photo lab uses when processing your film. That's the fun part though—you never know what you're gonna get.

☹️ Sadly, Poprocket and Gotham are no longer Instagram filters—an even better reason to create your own!

Among the many comments made about the T-Mobile Touch Pro 2 was a request for more information about the phone's camera. The Touch Pro 2 has a 3.2 megapixel rear camera with zoom and video recording. RTX 4080 pre-orders and stock update The only image processing in this test was resizing for web posting and minimal sharpening. Each photo is full size. Unlike the AT&T Fuze and Touch Pro, the Touch Pro 2 doesn't have a keyboard shortcut to activate the camera. The camera must be accessed through TouchFlo 3D, the Start menu, or the Programs screen. They also have no physical trigger. When you turn on the camera, the overlay screen appears (the image is displayed underneath, of course). The shutter emblem activates the shutter, and the lower-right panel displays menu options including photo gallery, camera style, settings, and an "x" to exit the camera app. Focusing works in two ways: tap the screen and the camera will focus on the touched area of the photo, or press the shutter button and the lens will focus before taking the photo. The camera can also record videos, take panoramic photos and add image themes. Video resolution is maximized at VGA quality and overall quality is slightly better than Touch Pro/Fuze video recording. Image themes are graphical renderings that allow you to insert an image, similar to carnival photos where you poke your face through a hole in a plywood figure. The Touch Pro 2 camera has a very detailed manual. A note on the guide is that it lists a front-facing camera that can be used for video calls or selfies. As mentioned in the help, this feature isn't available on all cameras, and the T-Mobile Touch Pro 2 lacks a front-facing camera. And yes, we expect other US airlines to follow suit. Overall Impression While the Touch Pro 2 won't replace my DSLR any time soon, it is an improvement over the Touch Pro/Fuze. The large screen helps with composition, and while I miss the physical shutter button, I like the touch controls. The Touch Pro 2 also lacks the flash that the Touch Pro/Fuze has, but I don't see that as a huge loss for photography. The camera seems to adjust the white balance and focus better. The ability to focus on a specific part of the image is a bonus, allowing you to be more discreet when focusing on a subject. The Touch Pro 2 camera is an improvement over the Touch Pro camera. 4 More features, but fewer physical controls. Overall, I think the camera keeps up with the general improvements that the Touch Pro 2 introduces. Instagram Followers Pro is an app and also a website that offers free followers and likes for your Instagram account. It is becoming very popular nowadays which leads to more people downloading and trying it. However, it went wrong as there are no insta followers for iOS. But don't worry, in this passage you will haveApp knowledge to see if it's worth waiting for the iOS version for Insta Pro subscribers or trying the alternatives featured in this article.
