

I'm not robot

Auto-Tune Pro X is a top-of-the-line version of Auto-Tune that boasts an advanced Graph Mode for precise pitch editing. With over two decades of industry success, Auto-Tune has established itself as the go-to tool for professional pitch correction and vocal effects in popular music. The software offers accurate pitch correction and real-time editing capabilities through its optimized Graph Mode and Auto Mode. The package includes a collection of artist presets and a preset manager to streamline the creative process. Multi-View allows users to edit multiple vocals simultaneously, while Free extended ARA2 support is coming soon for select DAWs. Version 10.2.0 boasts new features such as compatibility with Apple Silicon and bug fixes for specific issues in popular digital audio workstations like Pro Tools. Auto-Key 2 is an auto-key plugin that speeds up tuning workflows, saving valuable studio time. Vocal Reverb features powerful AI Assist tech, automatic EQ, three reverb algos, ten pre/post effects, and two types of delay. Articulator revives the classic talk box sound, perfect for talking guitars and singing synths. Aspire is a tool that lets you adjust breathiness in vocals to match your style. Choir turns single voices into lush choirs with pitch, timing, and vibrato variations. Duo automatically generates doubled vocals from existing tracks, while Harmony Engine creates professional-quality harmonies in real-time. Mic Mod models microphones for ideal sounds, Mutator offers sound design tools for unusual voices, and Punch adds dynamics to vocals. SoundSoap fixes broken vocals and enhances timbre, Sybil controls vocal hisses, and Throat lets you customize vocal performance with a virtual human tract. Warm plugins simulate high-quality analog tube preamps. This software includes various Antares Auto-Tune versions, offering comprehensive tools for perfecting vocal performances in music production. Working with established industry tools simplifies collaboration significantly. Accessing the entire library of Antares Auto-Tune and AVOX plug-ins is now possible at an entry-level cost. Key features of this package include the industry-standard pitch correction capabilities, such as the signature "Auto-Tune Effect" and a comprehensive toolkit for vocal production that supports all major digital audio workstations (DAWs). The bundle offers high-quality recordings at a budget-friendly price point. Included tools are: Auto-Key - automatic key detection, Auto-Tune Access with essential features, Auto-Tune Artist for live performances, Auto-Tune EFX+ for vocoder-style effects, and more. AVOX ARTICULATOR provides digital talkbox capabilities while AVOX ASPIRE removes aspiration noise. Other features include AVOX CHOIR for doubling vocals, AVOX SYBIL for frequency reduction, and AVOX THROAT for physical modeling of the vocal tract. Harmony Engine generates harmonies, Mic Mod models classic microphones, and technical requirements support Windows 11, Windows 10 with 2 GB RAM (4 GB recommended) and 1GB MB or more free hard disk space.
