Formally theory, a string is a finite sequence, ordered by characters such as letters, digits or spaces. The blank string is the special case where the sequence has a zero length, so there are no symbols in the string. There is only one blank string, because two strings are different only if they have different lengths or a different sequence of symbols. In formal treatments, [1] the empty string is denoted with ϵ or sometimes λ or λ . The empty rope should not be confused with the blank language \emptyset , which is a formal language (i.e. a string set) that does not contain strings, even the empty string. The empty string has several properties: $|\epsilon| = 0$. Its length of the string is zero. ϵ
