Tap Email Support and don't forget to attach screenshots or a recording of the problem. Any information you can provide can make your experience more positive. Thank you so much! Kinemaster is an amazing editing app. I use it all the time! I recommend everyone I know I haven't found anything else to complain about except for one thing - the watermark. Now, before the latest version of Kinemaster, I never had a problem with the watermark. It was small and in the upper right corner. However, since the release of the latest version of Kinemaster, it appears that the watermark has been updated to be larger. This is a problem for me (and probably some other users) because some people, myself included, cannot afford to completely remove the watermark. Don't get me wrong, I totally understand why you have the premium app option. My only complaint is that the watermark is a bit large. I have no idea if the developers will ever see this review, but if so, could you please reduce the watermark a bit? Otherwise awesome app, keep up the great work guys!! Hello, thanks for your opinion about Kinemaster premium. Edit interfaces with many tools, a large part of the asset store and unlimited storage are available for free so that all users can create amazing videos. To remove the watermark and all ads, you should sign up for movie bonus. We hope you continue to get your inspiration and create amazing things! Can't you keep both and let KM5 users stick with them if they want? Do you even have KM6 and upgrade to KM5 instead of the new app? It would be much easier to do either of them than what you are doing now. So keep both and don't force others to cross if they don't want to. How would you feel if I made you support the Outfit7 games instead of working alone? And if you say your gaming is important, grab the KM5 in 2023. in may? Doesn't that contradict what you're saying, or wouldn't it seem like you only care about KM6 and even force KM5 users to use KM6? There is an easier way to do this without having to change KM5 users to KM6. Keep both and they don't all have to happen. In addition, both KM5 users are granted the free right to remain on KM5 if they wish. We're sorry you feel this way about making others do what you want. Please send specific feedback by contacting the support team and they will be happy to help you. You can do this by clicking on the FAQ button in the app and clicking on the prompts related to the problem.>> Create >> Press the question mark? (above on the screen) >> FAQ Press the email support button at the bottom if your problem has not been solved. Please add screenshots or screen recordings of your problem. We hope that you will soon be able to create great videos again!
